High Performance Workshop Series Using the Predictive Index Talent Optimization Software

The *High Performance Series* consists of two workshops designed to help teams reach peak performance by leveraging the Predictive Index 4-quadrant Team Discovery model and turning insights into action with the guidance of a ClearRock Talent Consultant.

Part 1: Discovering Your Team Type

Teams need trust and communication to thrive. This 2-hour workshop helps build self-awareness and trust amongst your team, establishing an understanding of each member's motivations and work style, and uncovering your group's specific "Team Type," strengths and blind spots. This session lays the groundwork for effective communication and decision making, resulting in more cohesion and collaboration.

Part 2: Designing for Strategic Action *(Part 1 is a prerequisite)*

Building upon the learnings from the Discovering your Team Type Workshop, this 2-hour session focuses on improving team performance by mapping a group's Team Type to its Strategy Type, revealing areas of potential misalignment between the team's natural work styles and strategic priorities, and developing actionable ways to address them.
